DETAILED ACTION

Election/Restrictions

1. Claims 5 and 6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 2.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 7, 1, and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent No 6,044,723 to Eda et al.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No 4,827,790 to Bisiach in view of Eda et al.

In reference to claims 7 and 1, Bisiach discloses a worm shaft 18, driven by an electric motor 54, and a worm wheel 16 with biasing member 55 to bias the worm shaft toward the worm wheel in a deflective direction of the worm shaft. However, the worm of Bisiach is not mounted to a steering shaft. Eda et al. teach the use of a motor-driven worm shaft to drive a worm wheel mounted to a steering shaft. It would have been obvious to one skilled in the art at the time the invention was made to utilize the worm and wheel of Bisiach with the steering shaft of Eda et al. in a power steering system, as Eda et al. teaches the worm and wheel as a means of providing power-assisted steering.

In reference to claims 2-4 Bisiach further discloses an interlocking member 52 between the worm shaft and the output shaft of the motor. The biasing member of Bisiach includes a screw body 60 fastened in a tapped hole of the housing of the worm shaft, as seen in Figure 4. A spring body 66 is interposed between the screw body and the worm shaft. The screw body is in contact with a bearing fitted to the worm shaft via box 30.
